

WAREHOUSE OPERATIONS IMPROVEMENT – INVENTORY MANAGEMENT

www.kaizen-consult.biz

We help companies with Supply Chain and warehouse operations in Sub-Saharan Africa to improve warehouse operations effectiveness and reduce costs by adapting processes and cutting wastes, smoothening their processes.

Growing operations can be difficult to control, and poor performance and costly errors can set in when processes are not well established. It is essential to optimize your warehouse operations to gain in control while keeping the necessary agility to face fluctuation or growth.

Creating Agility & performance control

Kaizen Consult brings its expertise in Warehouse management in African context to better control the performance of your operations and create the required flexibility. A Lean approach will help guarantee the right level of capacity while keeping an agile structure, providing real value adding inventory management.

Ideal for all companies involved in warehouse operations:

- Retail & FMCG
- Industry products
- Logistics & 3PL
- Pharmaceutical

What we propose

- Complete review of your warehouse processes & setup – re-design it with your team
- Lean thinking review to identify and advise on quick wins to be implemented
- Implementation of Lean tools to help the team be more engaged and create continuous improvement
- Review or design performance dashboard
- Improve system accuracy
- Ideally coupled with forecasting and S&OP process review
